Medi-Cal

Important Provider Notice: #340

Subject: 340B UD Modifier Additions or Corrections to Previously Paid/Denied Claims

All 340B UD modifier addition or correction requests received on or after May 1, 2019 must be submitted through the Partnership HealthPlan of California (PHC) Pharmacy Department by email to: 340BQIP@partnershiphp.org. Claim corrections to add or correct the UD modifier on a previously paid or denied claim service line will no longer be accepted through the PHC Claims Online Services CIF process.

Providers who are 340B Covered Entities are the sole party responsible for the proper identification (flagging) of all 340B drug claims. Providers are required to identify/flag all Physician-Administered Drug (PAD) claim services lines where the provider utilized 340B drugs. The claim service lines are identified/flagged by the entry of the UD modifier in combination with the HCPC or CPT code that best identifies the drug administered and the NDC code from the drug container.

In the event a provider submits claims or encounter data to PHC which include PADs that were obtained through the 340B Program, and the UD modifier was not included with the original claim billed, corrections for that claim must now be done through the PHC Pharmacy Department. Instructions on how to make these corrections can be found on the PHC website, specifically on the 340B Compliance Program page listed under the Pharmacy section. Please see <http://www.partnershiphp.org/Providers/Pharmacy/Pages/340B-Compliance-Program.aspx> for additional information.
