Managing Pain Safely – Aim Statement

By December 31, 2016, we will improve the health of PHC members by ensuring that prescribed opioids are for appropriate indications, at safe doses, and in conjunction with other treatment modalities as measured by a:

- Decrease in total number of initial prescriptions by 75%
- Decrease in total number of prescription escalations by 90%
- Decrease in total number of patients on high-dose opioids* by 75%

*Defined as greater than 120 mg. MED

Community Coalition Status

PHC COUNTY COALITION STATUS

	Key
1	Little or No Effort (Yet)
2	Initial Meetings, Beginning of Framework Formation
3	Framework Formation, Action Teams Initiating
4	Strong Effort- Framework Implemented, Regular Meetings, Active Action Teams, Working towards Milestones
5	Robust Effort- Active Action Teams, Accomplishing Milestones, Measurable Results

Looking Ahead in 2016: Health Plan Activities

Provision of tele-consult services for complex patients on high-dose opioids

Education and coordination around addiction screening and treatment

Partner with CHCF for continued support in developing and sustaining local efforts targeted at reducing improper use of opioids

Planning process for creating integrated clinics for high utilizers

Pharmacy academic detailing

MPS provider site level data sharing

Tapering guide/ toolkit

Naloxone Pilot

Partnership HealthPlan of California

What We Measure

Total Opioid Prescriptions PMPM

- # opioid prescriptions / # eligible members per month.

% Users on Unsafe Dose

- # opioid users with daily averages of Morphine Equivalent Doses (MED) >120 mg / # total opioid users X 100.

Initial Opioid Prescriptions PMPM

- Total opioid prescriptions per member per month for members with no opioid prescriptions in the 90 days prior to the measurement period.
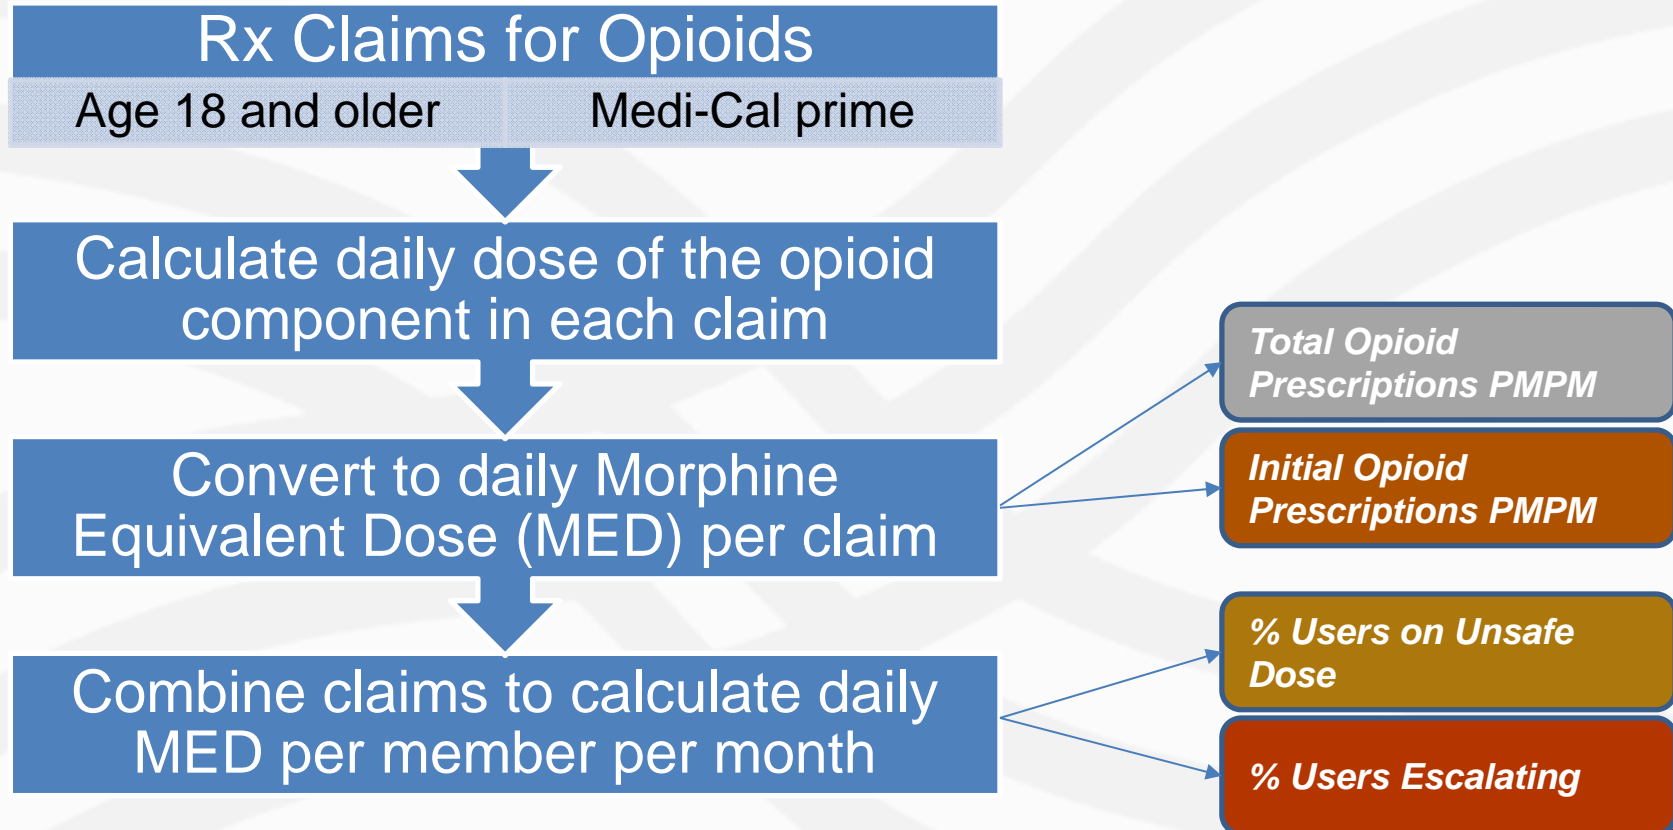

% Users Escalating

- # chronic opioid users with an escalating dose / # total opioid users X 100 over the measurement month.

Escalation: an average daily dose during the measurement period that is > 5% than the average daily dose in the 90 days prior the first day of the measurement period.
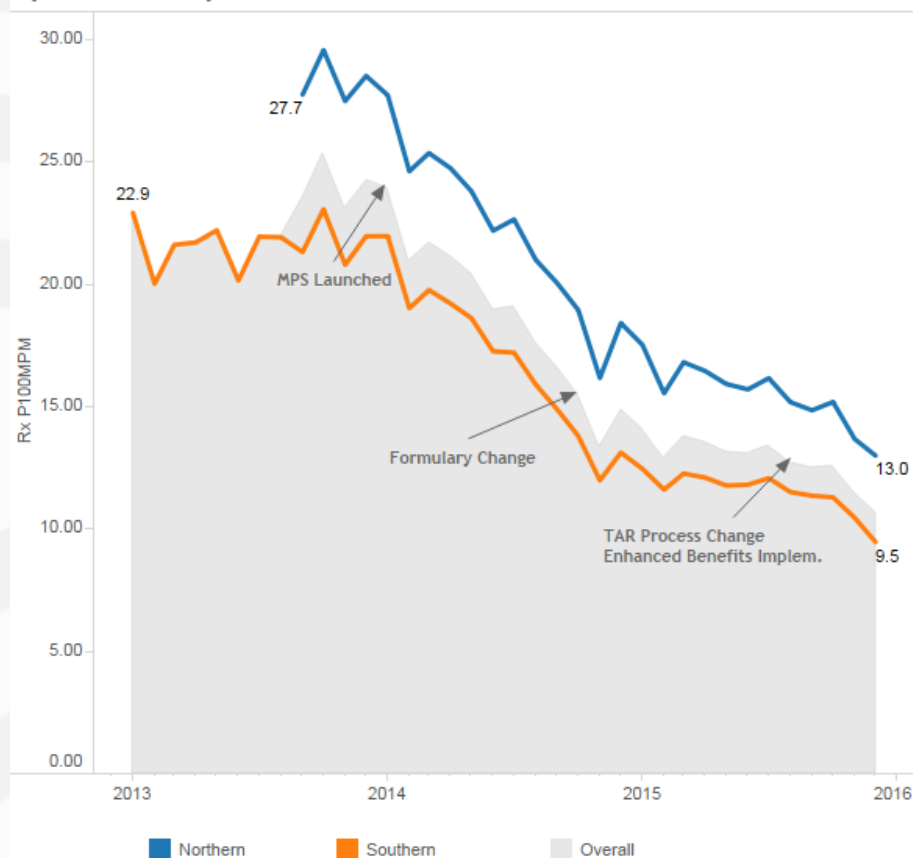

Chronic opioid user : members with opioid prescriptions for at least 3 consecutive months with total 75 days supply or higher

How Data is Processed

Rx Claims for Opioids

Age 18 and older	Medi-Cal prime

↓

Calculate daily dose of the opioid component in each claim

↓

Convert to daily Morphine Equivalent Dose (MED) per claim

Total Opioid Prescriptions PMPM

Initial Opioid Prescriptions PMPM

↓

Combine claims to calculate daily MED per member per month

% Users on Unsafe Dose

% Users Escalating

Data Sharing Process

Dina Haynes, BA, CPhT

Associate Director, Pharmacy Operations

Partnership HealthPlan of California

Data Request Process

- Providers can reach out to PHC to request data using template provided
- PHC will notify health center medical director of request
- PHC will generate request
- PHC will send data to health center medical director to distribute at the site level

Email all requests to MPS@Partnershiphp.org

PARTNERSHIP
HEALTHPLAN
of CALIFORNIA

High Prescriber Sharing Process

- PHC Regional Medical Directors will reach out to PCP Sites who have 15 or more patients on high doses (120mg MED) regardless of request for data

PARTNERSHIP
HEALTHPLAN
of CALIFORNIA

Data Request Process: Information Needed

- Site name/location
- Contact information
- Site NPI
- PCP
- Requested by
- Date Needed
- Start Date
- End Date

PARTNERSHIP
HEALTHPLAN
of CALIFORNIA

Data Request Process: Description of Data Request

Types of reports available include

- Chronic opioid users by assigned PCP Site
- Chronic opioid users by county (aggregate)
- PCP Site detail report with dose pattern
- Chronic opioid users by county and dose group (aggregate)

- Email all requests to MPS@Partnershiphp.org
