

Medi-Cal Carve-Out Medication List

The drugs shown below are contractually carved-out to the Department of Health Care Services (DHCS). This means that these medications are covered by the Medi-Cal Fee-for-Service (FFS) program and are billed to State Medi-Cal by the pharmacy and are not reimbursable by Partnership Healthplan (PHC).

There are four (4) classes of medication that are carved out:

1. Human Immunodeficiency Virus (HIV) and AIDS treatment and prevention
2. Certain alcohol and heroin detoxification and dependency treatment drugs to help treat substance abuse (e.g., Suboxone, Narcan, Naltrexone, Antabuse)
3. Certain psychotherapeutic drugs (e.g., Abilify®, Risperdal®).
4. Blood factor products used for treatment of Hemophilia.

Note that carve-out status is assigned to specific drugs by DHCS, regardless of reasons or diagnosis for use.

Please note that this list is frequently updated by Medi-Cal with additions and deletions of drugs.
