

Medi-Cal Carve-Out Medication List

The drugs shown below are contractually carved-out to the Department of Health Care Services (DHCS). This means that these medications are covered by the Medi-Cal Fee-for-Service (FFS) program and are billed to State Medi-Cal by the pharmacy and are not reimbursable by Partnership Healthplan (PHC).

There are four (4) classes of medication that are carved out:

1. Certain alcohol and heroin detoxification and dependency treatment drugs to help treat substance abuse (e.g., Suboxone, Narcan, Naltrexone, Antabuse)
2. Certain psychotherapeutic drugs (e.g., Abilify®, Risperdal®).
3. Human Immunodeficiency Virus (HIV) and AIDS treatment and prevention
4. Blood factor products used for treatment of Hemophilia.

Note that carve-out status is assigned to specific drugs by DHCS, regardless of reasons or diagnosis for use.

Please note that this list is frequently updated by Medi-Cal with additions and deletions of drugs.

If you have questions regarding the content of this notice, please contact Member Services at (800) 863-4155 Monday through Friday, 8:00am – 5:00pm.
