

PHC FORMULARY Treatment Options for Adult ADHD/ADD (Ages ≥18 yrs)

The products shown below are on PHC’s pharmacy formulary and do not have pediatric age requirements, thus they are available for the treatment of ADHD for those over 17 years old.

These agents may or may not be FDA approved for the treatment of adult ADHD (ie, some may be off-label for adult ADHD &/or off-label for ADHD of any age).

Presence on this chart indicates formulary availability as of April 20 2021, and is not intended as a treatment recommendation or guideline.
