Drug	Cost per Unit AWP per Red Book *08/2019*	Source	FDA Indication	FDA Approved Age Limits (yrs) or PHC limit	Dosage Form	Formulary Status	PHC Restriction/Criteria (see formulary search tool for full criteria details).
<b>SHORT ACTING BETA AGONIST (SABA)</b>							
Ventolin HFA® (Albuterol HFA, 18 gm) 90 mcg	\$62	Generic	Asthma/ COPD	≥ 4	MDI	F	Limited to 18gm (1 inhaler) per 15 days
ProAir HFA® (Albuterol HFA, 8.5 gm) 90 mcg	\$74	Generic	Asthma/ COPD	≥ 4	MDI	NF	Documentation of prior use of BOTH Ventolin HFA (generic) AND ProAir RespiClick.
Proventil HFA® (Albuterol HFA, 6.7 gm) 90 mcg	\$74	Generic	Asthma/ COPD	≥ 4	MDI	NF	
ProAir RespiClick® (Albuterol) 90 mcg	\$73	Brand	Asthma/ COPD	≥ 4	DPI	F	Limited to 2 units per month
Albuterol Sulfate 0.63 mg/3 ml, 1.25 mg/3 ml, 2.5 mg/3 ml,	\$47/30 vials	Generic	Asthma/ COPD	≥ 2	NS	F	0.63 mg/3 ml & 1.25 mg/3 ml has a limit of 270 ml (90 vials) per 25 days. 2.5 mg/3 ml has a limit of 225 ml (75 vials) per 25 days.
Albuterol Sulfate, concentrate 2.5 mg/0.5 ml, 5 mg/1 ml	\$58/20 ml	Generic	Asthma/ COPD	≥ 2	NS	F	Limited to 40 ml per month
Xopenex HFA® 45 mcg (Levalbuterol HFA)	\$71	Generic	Asthma/ COPD	≥ 4	MDI	NF	Documentation of failure or Intolerance to albuterol HFA products.
Xopenex® (Levalbuterol) 0.31 mg/3 ml, 0.63 mg/3 ml, 1.25 mg/3 ml	\$161/24 vials	Generic	Asthma/ COPD	≥ 6	NS	NF	Documentation of failure or intolerance solution to albuterol HFA w/spacer, albuterol nebulizer solution and levalbuterol HFA with spacer.
Xopenex® (Levalbuterol), concentrate 1.25 mg/0.5 ml	\$161/24 vials	Generic	Asthma/ COPD	≥ 6	NS	NF	

**STEP:** These formulary agents require prior treatment with prerequisite 1<sup>st</sup> line drug therapy. Member must have had a previous trial of one or more designated 1<sup>st</sup> line agent(s) as evidenced by a paid claim within the designated time frame in order for the STEP medication claim to adjudicate without a TAR.

**Code 1 Restriction:** Code 1 medications are formulary, but the use is limited to a specific medical condition. Although Code 1 restricted drugs do not require a TAR when the Code 1 restriction is met, pharmacy providers must maintain documentation that the Code 1 requirement is met (such as documenting the indication on the original Rx, as obtained from the prescriber).

**Key to Restriction Abbreviations:**

DPI = Dry Powder Inhaler    MDI = Meter Dosed Inhaler    NS = Nebulizing Solution    STE = Step Therapy Requirement    F = Formulary    NF = Non-Formulary, TAR required  
 C1 = Code 1 Restriction    AL = Age Limit    QL: Quantity Limit    SQ = Subcutaneous Injection    IV= Intravenous Injection
