

Advanced Access Webinar Series for Primary Care Providers

The goal of Advanced Access is to achieve results by increasing opportunity for patients to seek and receive care from the provider of their choice at the time of their choosing.

Intended Audience: PCPs, NPs, PAs, RNs, LVNs, MAs, QI staff, office managers, and front/back office staff

Advanced Access is designed to establish and refine the empanelment process; optimize care teams; improve clinical outcomes; and increase patient, provider, and staff satisfaction.

Throughout the webinar series, we will provide an overview of the guiding principles of Advanced Access. The webinars will cover strategies to reduce delays for appointments, pertinent aims and measures, and resources to support continued improvement.

Barbara Boushon, RN, BSN, has been selected as the faculty to lead this webinar series. Barbara is an expert in the field and has over 20 years of experience leading collaboratives, webinars, and training sessions on Advanced Access across the United States.
