

TELEHEALTH TECHNOLOGY COMPARISON CHART

The comparison chart below summarizes the key features of the top five telehealth software programs in the toolkit that most of our network primary and specialty care providers are using today to provide care to our members across our 14 counties. The features displayed in the chart were identified by current users and other resources as the most important features to consider for implementation. For example, all five options are HIPAA compliant, offer screen sharing options, includes a scheduling or calendaring component and offer a patient queue or waiting room option.

Each telehealth software does vary with its setup requirements and ability to integrate with electronic medical record systems. Of note, each software offers a video orientation or demonstration of the software, several on-demand trainings and webinars and a host of learning and troubleshooting materials for prospective users. To learn more about each telehealth software's setup and getting started requirements, click on the different telehealth technology icon names located in the Toolkit.

Specifications, Features, Tools, Plans & More	Zoom	Doxy.Me	SecureVideo	Doximity	Webex
