

Funding Opportunities:

CalAIM Enhanced Care Management and Community Supports

Various funding opportunities are available to Partnership HealthPlan of California's CalAIM Enhanced Care Management (ECM) and Community Supports (CS) network providers. This document (updated March 20, 2023) aims to create one document with a brief summary of those opportunities and where to find more information in order to support our internal staff in providing pertinent information to our CalAIM providers.

There are two types of funding, those that are facilitated by Partnership and those that are facilitated by the Department of Health Care Services (DHCS). Please note that for DHCS-led opportunities, DHCS is the subject matter expert and often makes updates to their website, so it is strongly advised to encourage providers to check there for the most up-to-date information.

Partnership Facilitated

Partnership CalAIM Grant: Grant funds intended to invest in ECM and CS provider capacity and delivery system infrastructure to support the launch of these important programs. Providers submitted applications indicating what they needed funds for, how much they needed, and milestones indicating they had reached their goal.

Currently this program is not accepting applications. For any questions, please reach out to Grants@partnershiphp.org

CalAIM Quality Improvement Program (QIP): Embedded in the existing QIP, dollars were allocated to incentivize providers to submit reporting timely and accurately. It is likely that future QIP dollars will aim to incentivize improvement in quality measures tied to ECM efforts.

All ECM providers are eligible for this program. For any questions, please reach out to ecmqip@partnershiphp.org

DHCS Facilitated

PATH Capacity and Infrastructure Transition, Expansion and Development (CITED):** DHCS has engaged with a third-party administrator to oversee the application process for PATH CITED funding. It provides funding to enable the transition, expansion, and development of ECM and CS capacity and infrastructure. Providers can find more information, sign up for informational webinars and submit an application through DHCS' website <https://www.ca-path.com/cited>

****CITED Round 2 funding is now open. Applications are due May 31, 2023.**

Justice-Involved Capacity Building Program: Provides funding to correctional agencies, correctional institutions, and county social service departments to support the implementation of pre-release Medi-Cal application and suspension processes. DHCS launched this in two rounds. Round 1 was a planning grant and Round 2 was an implementation grant. Applicable entities can find more information, sign up for informational webinars and submit an application through the DHCS website <https://www.ca-path.com/justice-involved>

PATH Technical Assistance/TA Marketplace: Provides funding for providers, community-based organizations, counties, and others to obtain technical assistance resources to establish the infrastructure needed to implement ECM and CS. Providers can find more information, shop the marketplace to see a list of available TA, and register for technical assistance through the DHCS website <https://www.ca-path.com/ta-marketplace>

PATH Collaborative Planning Implementation/Learning Collaboratives: DHCS has engaged with a third-party administrator to oversee the administration and management of the program. This administrator selected facilitators to lead groups of stakeholders in a county or region. The goal of these groups is to work together to share best practices and identify/resolve issues. Partnership Regional Directors are responsible for representing Partnership in the region(s) they oversee so Partnership can support issue resolution as appropriate. Partnership highly encourages all ECM and CS providers to register as a participant. Providers can find more information and register to be a participant through DHCS' website <https://www.ca-path.com/collaborative>
