Who is UC Davis Health?

UCDH harnesses the power of an entire university's nationally-ranked resources and research to tackle the most pressing health care issues facing the world today. The academic organization's telehealth program encompasses a dedicated, multidisciplinary team of physicians, clinicians, nurses, researchers, technology experts and administrators working together to provide high-quality care. Using secure, state-of-the-art telecommunications technology, UCDH connects medical facilities and primary care providers (PCPs) with specialists via real-time consultations to provide care when patients need it most.
